

ABSTRAK

Penelitian ini bertujuan untuk mengetahui, menganalisis, dan menjelaskan: (1) *current ratio*, *earning per share* dan harga saham; (2) pengaruh secara parsial dari *current ratio* dan *earning per share* terhadap harga saham; (3) pengaruh secara simultan dari *current ratio* dan *earning per share* terhadap harga saham. Penelitian ini menggunakan metode kuantitatif dengan pendekatan deskriptif verifikatif. Populasi dalam penelitian ini yaitu Perusahaan Sektor Industri Dasar dan Kimia Periode 2015-2019. Teknik sampling yang digunakan yaitu *purposive sampling*. Analisis yang digunakan yaitu analisis statistik deskriptif, uji asumsi klasik, analisis regresi linier berganda, koefisien determinasi, dan uji hipotesis. Berdasarkan hasil penelitian, nilai *current ratio* pada Perusahaan Sektor Industri Dasar dan Kimia mempunyai nilai yang cukup likuid, nilai *earning per share* bervariasi dan harga saham bervariasi dan bersifat fluktuatif. Secara parsial *current ratio* berpengaruh dan tidak signifikan terhadap harga saham, sedangkan *earning per share* berpengaruh signifikan terhadap harga saham. Secara simultan, *current ratio* dan *earning per share* berpengaruh signifikan terhadap harga saham.

Kata kunci: *current ratio*; *earning per share*; harga saham

ABSTRACT

This study aims to determine, analyze, and explain: (1) current ratio, earning per share and stock price; (2) Partial effect of current ratio and earning per share on stock prices; (3) Simultaneous effect of current ratio and earning per share on stock prices. This study uses a quantitative method with a descriptive verification approach. Population in this study are stock price of basic industry and chemicals sector company listed on Indonesian Stock Exchange period 2015-2019. The sampling technique used is purposive sampling. The analysis used is descriptive statistical analysis, classic assumption test, multiple linear regression analysis, coefficient of determination and hypothesis test. Based on the result of the study, the value of current ratio in basic and chemical industrial sector companies has a fairly liquid value, the earning per share value is varies and the stock price is varies and volatile. Partially, current ratio has an effect and is not significant on stock prices while earning per share has a significant effect on stock prices. Simultaneously current ratio and earning per share have a significant effect on stock prices.

Keywords: current ratio; earning per share; stock price
