ABSTRACT

This study aims to determine the role of parents in motivating student learning during the COVID-19 pandemic at SDN Plawad III. The research method used is a qualitative research method. The subjects in this study were the parents of fourth grade students at SDN Plawad III for the 2020/2021 academic year. The data collection technique in this study used observation and questionnaires to parents of students. The results of this study are based on 4 indicators of the research questionnaire that are based on indicators of learning support with a percentage of 40%, indicators of paying attention to children in learning with a percentage of 40%, indicators of teaching children to learn with a percentage of 39%, facilitating children in learning with a percentage of 38%. Based on the research results obtained, it can be concluded that parents of students have less role in providing learning motivation to students during online learning.
