ABSTRAK

Penelitian ini bertujuan untuk mengetahui hubungan antara ketaatan beribadah dengan perilaku sopan santun siswa kelas V Sekolah Dasar Gugus 02 Kecamatan Karawang Timur. Penelitian ini merupakan jenis penelitian kuantitatif. Populasi yang digunakan dalam penelitian ini adalah seluruh siswa kelas V SDN Gugus 02 Kecamatan Karawang Timur yang berjumlah 328 orang siswa. Dengan mengambil sampel 25% dari anggota populasi, maka didapat sampel berjumlah 82 orang siswa. Teknik pengumpulan data melalui angket ketaatan beribadah dan angket perilaku sopan santun siswa. Teknik analisis data untuk menguji hipotesis dilakukan dengan perhitungan statistik korelasi *product moment*. Hasil dari uji reliabilitas ketaatan beribadah diperoleh nilai r_{11} sebesar 0,829 dan hasil dari uji reliabilitas perilaku sopan santun diperoleh nilai r_{11} sebesar 0,784. Hasil pengujian hipotesis, terdapat hubungan yang positif dan signifikan antara ketaatan beribadah dengan perilaku sopan santun siswa. Berdasarkan perhitungan uji hipotesis hasil penelitian ditunjukkan dengan nilai korelasi *product moment* sebesar r_{hitung} 0,466 > dari r_{tabel} 0,217 dengan signifikans 0,05 dan $n = 82$ menunjukkan bahwa hipotesis diterima. Dari hasil penelitian ini dapat disimpulkan bahwa ketaatan beribadah dengan perilaku sopan santun siswa memiliki hubungan yang kuat.

Kata kunci: Ketaatan Beribadah, Perilaku Sopan Santun

**THE RELATIONSHIP OF OBEDIENCE OF WORSHIP WITH THE
STUDENT'S COMPLETE BEHAVIOR IN CLASS V ELEMENTARY
SCHOOL**

ABSTRACT

This study aims to determine the relationship between religious observance and polite behavior of fifth grade students of Elementary School Cluster 02, East Karawang District. This research is a type of quantitative research. The population used in this study were all fifth grade students of SDN Gugus 02, East Karawang District, amounting to 328 students. By taking a sample of 25% of the members of the population, it is obtained a sample of 82 students. The data collection technique in this study was through a worship obedience questionnaire and a polite behavior questionnaire. The data analysis technique to test the hypothesis is done by calculating the product moment correlation statistic. The results of the validity test of the worship obedience questionnaire obtained 27 instrument items which were declared valid from the 30 instrument items tested and the results of the polite behavior questionnaire validity test obtained 30 instrument items which were declared valid from the 35 instrument items tested. The results of the reliability test of worship obedience obtained an r_{11} value of 0.829 and the results of the polite behavior reliability test obtained an r_{11} value of 0.784. The results of hypothesis testing, there is a positive and significant relationship between obedience to worship and student behavior. Based on the calculation of the hypothesis test, the research results are indicated by the product moment correlation value of r_{count} 0.466 > from r_{table} 0.217 with a significance of 0.05 and $n = 82$ indicating that the hypothesis is accepted. From the results of this study it can be concluded that the obedience of worship with the polite behavior of students has a strong relationship.

Keywords: Obedience to Worship, Polite Behavior
