ABSTRACT

This research is intended to identify the role of parents in the online learning process at SDN pancakarya I. The subjects used in this study are 3 student parents, 3 student v and SDN class class teachers, data collection I. Techniques used in research are data reduction, presentation of data and deduction. Studies show that the parents of class v found it difficult to guide their child in online learning because the learning level was so difficult that the parent was so overwhelmed with the task of explaining it to the child. Children who do not understand and ask parents for help to teach them because parents tutor in online learning, but parents also have a problem communicating to children because they do not understand, so that parents cannot create a creative force to help eliminate material explanations so that students can understand the material. As for what parents should strive for in online learning to make children less saturated in teaching activities, parents always buy reading books to children that attract the minatereka in studying, parents increase their horizons in learning

Keywords: *the role of parents, online learning*
