

ABSTRAK

Sistem informasi akademik lembaga kursus yang dinamis, sederhana, dan mudah digunakan diharapkan dapat mempermudah proses operasional sehari-hari pada Lembaga kursus Lamani Indonesia. Segala macam proses akademik yang terjadi pada Lembaga kursus Lamani Indonesia mulai dari proses pendaftaran sampai dengan pengambilan sertifikat jika sudah dinyatakan kompeten bisa saling terintegrasi di dalam 1 aplikasi dan data yang tersimpan bisa dengan mudah dicari ketika dibutuhkan kapan saja. Metodologi pengembangan system yang digunakan yaitu SDLC (System Development Life Cycle) dengan metode pengumpulan data melalui wawancara, observasi, dan pengamatan langsung. Sistem informasi akademik ini diharapkan dapat membantu mempermudah proses akademik pada Lembaga kursus Lamani Indonesia.

Kata kunci : Lembaga kursus, akademik, website, SDLC

ABSTRACT

The academic information system which has dynamic, simple, and easy to use for course institutions is expected to simplify the daily operational processes of the Indonesian Lamani course institution. All kinds of academic processes that occur at the Lamani Indonesia course institution starting from the registration process to taking certificates if they are declared competent can be integrated into one application and the stored data can be easily searched when needed at any time. The system development methodology used is SDLC (System Development Life Cycle) with data collection methods through interviews, observations, and direct observations. This academic information system is expected to help facilitate the academic process at the Lamani Indonesia course institution.
