ABSTRACT

This study aims to determine the impact Analysis of Bullying Behavior on Self Confidence of Elementary School Students at SD Islam Al Furqon Karawang. This study uses a qualitative approach with the method used is a case study. The subjects in this study werw 1 student who was a victim of bullying, 1 classmate who were victims of bullying, and a class VI teacher at SD Islam Al Furqon Karawang. Data collection techniques were through observation checklists, interview gudelines, and documentation for victims, victims classmates, and class VI teachers. The data analysis technique used is data reduction, data presentation, and conclusions. The results of this study indicate that the impact of bullying behavior is very influential especially on the self confidence of victims through observation checklists and interview questions answered by students who are victims of bullying, classmates and class VI teachers. From the data that has been collected, it can be seen that students who are victims of bullying experience problems with their self confidence due to the bullying behavior that victims experience.
