ABSTRACT

Competition in the world of work is getting tougher every year. Everyone tries to get a job according to the person's own abilities. Every year, there are still many who experience difficulties in finding work. Differences in character and role are very important, so an institution must always manage its production factors effectively and efficiently in order to be able to create excellence through the human resources themselves in creating goods or services. This study aims to determine the effect of organizational culture and organizational communication on employee performance at PT. Muliaglass Float Division 3. The research design used descriptive and verification research with multiple linear regression analysis with data collection using the questionnaire method, the subjects in the study were employees of PT. Muliaglass Float Division 3 is 154. The results of the study state that there is a partial influence of organizational culture on the performance of employees of PT. Muliaglass Float Division 3 with the results of ttable values ($18.696 > 1.655$ or $tcount > ttable$). There is a partial influence of organizational communication on the performance of employees of PT. Muliaglass Float Division 3 with ttable values ($12.731 > 1.665$ or $tcount > ttable$). There is a simultaneous influence of organizational culture and organizational communication on the performance of employees of PT. Muliaglass Float Division 3 is 81% while the remaining 19% is explained by several other factors not examined in this study
