

ABSTRAK

Penelitian ini bertujuan untuk: (1) mengetahui perhitungan harga pokok produksi yang dilakukan oleh UMKM percetakan batu bata (2) mengetahui perhitungan harga pokok produksi berdasarkan metode *process costing* (3) mengetahui perbandingan perhitungan harga pokok produksi yang dilakukan oleh UMKM percetakan batu bata dengan perhitungan harga pokok produksi berdasarkan metode *process costing*. Penelitian ini dilakukan dengan menggunakan penelitian deskriptif kuantitatif, dimana data dikumpulkan melalui observasi, wawancara dan dokumentasi untuk mendapatkan gambaran dan informasi pada UMKM percetakan batu bata yang berada di desa mekarmulya. Berdasarkan hasil penelitian menunjukkan terdapat perbedaan dalam perhitungan harga pokok produksi antara perhitungan yang dilakukan oleh perusahaan dengan perhitungan menggunakan metode *process costing* terdapat selisih sebesar Rp. 638.400. Perhitungan dengan menggunakan metode *process costing* memperoleh harga pokok produksi yang lebih besar yaitu Rp. 28.838.400, dan perhitungan menurut pabrik memperoleh harga pokok produksi sebesar Rp. 28.200.000. Selisih perhitungan harga pokok produksi tersebut terjadi karena perusahaan tidak menghitung biaya keseluruhan.

Kata kunci: Harga Pokok Produksi, Metode *Process Costing*, Percetakan Batu Bata.

ABSTRACT

This study aims to: (1) find out the calculation of the cost of production carried out by a brick printing company (2) find out the calculation of the cost of production based on the process costing method (3) find out the comparison of the calculation of the cost of production carried out by a brick printing company with the calculation of production cost based on the process costing method. This research was conducted using quantitative descriptive research, where data was collected through observation, interviews and documentation to get an overview and information on a brick printing company located in the village of Bloommulya. Based on the research results, it shows that there is a difference in the calculation of the cost of production between the calculations made by the company and the calculation using the process costing method, there is a difference of Rp. 638.400. Calculation using the process costing method obtain a higher production cost of Rp. 28.838.400, and according to factory calculations, the cost of production is Rp. 28.200.000. The difference in the calculation of the cost of production occurs because the company does not calculate the overall cost.

Keywords: Production Cost, Process Costing Method, Brick Priting
